Masters2017 presents the graduating artists and designers of St Lucas School of Arts Antwerp and The Royal Academy of Fine Arts Antwerp.

During their program over 150 Master students were offered every possibility to develop their own voice and to excel in their respective artistic disciplines. They sharpened their observational skills and personal knowledge. They seized the opportunity to develop their very own vision of the future.

At Masters2017, you can discover how these Masters in the Arts and Design translate their experience of beauty and ugliness, of the relevant and obsolete, into exciting and inspiring processes and projects.
